

*A package for simulation, curve fitting,
statistical analysis, and graph plotting.*
<http://www.simfit.org.uk>

1. A Partial Least Squares Algorithm for Microarray Data Analysis Using the VIP Statistic for Gene Selection and Binary Classification
Burguillo,F.J., Corchete,L.A., Martin,J., Barrera,I., Bardsley,W.G. *Current Bioinformatics* (2014) **9** 348–359
2. Meta-analysis of microarray data: The case of imatinib resistance in chronic myelogenous leukemia.
Burguillo,F.J., Martin, J., Barrera, I., Bardsley, W.G. *Computational Biology and Chemistry* (2010) **34** 184–192
3. Modelling the simultaneous processes occurring during the BOD5 test using synthetic waters as a pattern.
Martín,M.J., Burguillo,F.J., Bardsley,W.G. *Bioprocess and Biosystems Engineering* (2009) **32** 207–216
4. Hyper-adhesion in desmosomes: its regulation in wound healing and possible relationship to cadherin crystal structure.
Garrod,D.R., Berika, Y., Bardsley,W.G., Holmes,D., Taberno,L. *J. Cell Science* (2005) **118** 5743–5754
5. Directed enzyme evolution guided by multidimensional analysis of substrate-activity space.
Larsson,A-K., Emren,L.O., Bardsley,W.G., Mannervik,B. *Protein Engineering. Design and Selection* (2004) **17** 49–55
6. Exploring the Functional Space of Combinatorial Mutant Libraries for the Directed Evolution of Novel Enzyme Activities.
Mannervik,B., Hansson,L.O., Bardsley,W.G. *Enzyme Functionality, Marcel Dekker, New York* (2003) 443–459
7. Uso del paquete Estadístico Simfit en la enseñanza del análisis de datos en ciencias experimentales.- Using the SIMFIT Statistical Package to teach Data Analysis in Experimental Sciences.
Burguillo,F.J., Holgado,M., Bardsley,W.G. *Revista de Educación en Ciencias-Journal of Science Education* (2003), **4** 8–14. CD-ROM with the SIMFIT Package was included in the issue.
8. Molecular map of the desmosome plaque.
North,A.J., Bardsley,W.G., Hyam,J., Bornslaeger,E.A., Cordingley,H.C., Trinnaman,B., Hatzfeld,M., Green.K.J., Magee,A.I., Garrod,D.R. *J. Cell Science* (1999) **112** 4325–4336
9. The photoreactivity of the retinal age pigment lipofuscin.
Wassel,J., Davies,S., Bardsley,W.G. & Boulton,M. *J. Biol. Chem.* (1999) **274**, 23828–23832
10. Intravitreal growth factors in proliferative diabetic retinopathy: correlation with neovascular activity and glycaemic management.
Boulton,M., McLeod,D., Charteris,D., Jarvis-Evans,J., Moriarty,P., Khaliq,A., Foreman,D., Allamby,D & Bardsley,W.G. *B. J. Ophthalmology* (1997) **81**, 228–233
11. Contributions of individual molecular species to the Hill coefficient for ligand binding by an oligomeric protein.
Edelstein,S.J & Bardsley,W.G. *J. Mol. Biol* (1997) **267**, 10–16
12. Using ASCII text files in post-fix notation (reverse Polish) to define mathematical models and systems of differential equations for simulation and nonlinear regression.
Bardsley,W.G. & Prasad,N *Computers and Chemistry* (1997) **21**, 71–82

13. Distinct desmocollin isoforms occur in the same desmosomes and show reciprocally graded distributions in bovine nasal epidermis.
North,A.J., Chidgey,A.J., Clarke,J.P., Bardsley,W.G. & Garrod,D.R. *Proc. Natl. Acad. Sci.* (1996) **93**, 7701–7705
14. Molecular analysis of HLA-DQB1 alleles in childhood common acute lymphoblastic leukaemia.
Dearden,S.P., Taylor,G.M., Gokhale,D.A., Robinson,M.D., Thompson,W., Ollier,W., Binchey,A., Birch,J.M., Stevens,R.F., Carr,T. & Bardsley,W.G. *British Journal of Cancer* (1996) **73**, 603–609
15. A computer program to study the optimal design for model discrimination with life science models.
Bardsley,W.G. & Melikhova,E.M. *Computers and Chemistry* (1996) **20** 145–157
16. The quantitative analysis of wound healing.
Bardsley,W.G., Satter,A., Armstrong,J.R., Shah,M., Brosnan,P. & Ferguson,M.W.J. (1995) *Wound Repair and Regeneration* **3(4)**, 441–456
17. Evaluation of model discrimination, parameter estimation and goodness of fit in nonlinear regression problems by test statistics distributions.
Bardsley,W.G., Bukhari,N.A.J., Ferguson,M.W.J., Cachaza,J.A. & Burguillo,F.J. (1995) *Computers and Chemistry* **19**, 75–84
18. Mathematical models for growth in alligator (*Alligator mississippiensis*) embryos developing at different incubation temperatures.
Bardsley,W.G., Ackerman,R.A., Bukhari,N.A.S, Deeming,D.C & Ferguson,M.W.J (1995) *J. Anatomy* **187**, 181–190
19. A statistical theory for the interpretation of altered flow cytometry profiles in terms of the binding of ligands to cell surface receptors and changes in gene expression.
Bardsley,W.G. & Kyprianou,E.K. (1995) *J. Math. Biol.* **34**, 271–296
20. SIMFIT. A computer package for simulation, curve fitting and statistical analysis using life science models.
Bardsley,W.G. (1993) In: *Modern trends in Biothermokinetics* pp. 455–458 Schuster,S., Rigoulet,M., Ouhabi,R. and Mazat,J.P. (Eds.) Plenum Publishing Corporation, New York
Also in the same volume:
The interpretation of flow cytometry profiles in terms of gene dosage and gene expression (with Kyprianou,E.K.) pp. 149–153
Optimal design for model discrimination. Choosing the best spacing and density of design points. (with Melikhova,E.M.) pp. 459–462
21. A statistical model and computer program to estimate association constants for the binding of fluorescent-labelled monoclonal antibodies to cell surface antigens and to interpret shifts in flow cytometry data resulting from alterations in gene expression.
Bardsley,W.G., Ross Wilson,A., Kyprianou,E.K. & Melikhova,E.M. (1992) *J. Immunol. Method.* **153**, 235-247
22. Analysis of gene dosage effects on the expression of CD18 by trisomy 21 lymphoblastoid cell lines using a statistical model to fit flow cytometry profiles.
Bardsley,W.G., McMurray,B.P., Robson,A., D'Souza,S.D. & Taylor, G.M. (1990) *Hum. Genet.* **86**, 181-186
23. The kinetics of adsorption of human immunoglobulin G to polyvinyl chloride enzyme-linked-immunoadsorbent-assay vessel walls.
McGinlay,P.B. & Bardsley,W.G. (1989) *Biochem. J.* **261**, 715-720

24. Optimal design for model discrimination using the F test with non-linear biochemical models. Criteria for choosing the number and spacing of experimental points.
Bardsley, W.G., McGinlay, P.B. & Roig, M.G. (1989) *J. theor. Biol.* **139**, 85-102
25. Fetal and maternal blood volumes in shed human placentae: discrepant results comparing morphometry to haemoglobin content.
Barker, G., Cunliffe, N., Bardsley, W.G., D'Souza, S.W., Donnai, P. & Boyd, R.D.H. (1988) *Placenta* **9**, 289-296
26. Molecular charge effects on the protein permeability of the guinea pig placenta.
Berhe, A., Bardsley, W.G., Harkes, A. & Sibley, C.P. (1987) *Placenta* **8**, 365-380
27. The non-Michaelian action of Thrombin on peptide p-nitroaniline substrates.
Izquierdo, C., Burguillo, F.J. & Bardsley, W.G. (1987) *Biochem. J.* **243**, 329-334
28. The use of non-linear regression analysis and the F test for model discrimination with dose response curves and ligand binding data.
Bardsley, W.G. & McGinlay, P.B. (1987) *J. theor. Biol.* **126**, 183-201
29. Conditions when statistical tests for model discrimination have high power. Some examples from pharmacokinetics, ligand binding, transient and steady-state enzyme kinetics.
Bardsley, W.G., McGinlay, P.B. & Riog, M.G. (1987) *Biophys. Chem.* **26**, 1-8
30. Model discrimination. Conditions when the correct model can be identified for transient, steady-state and binding data.
Bardsley, W.G. (1987) In: *Dynamics of Biochemical systems*. pp. 267-287 Damjanovich, S., Keleti, T. & Tron, L. (Eds.) Akademiai Kiado, Budapest (Symp. Biol. Hung. 30)
31. The F test for model discrimination with exponential functions.
Bardsley, W.G., McGinlay, P.B. & Wright, A.J. (1986) *Biometrika* **73**, 501-508
32. Inhibition of Copper Amine Oxidases.
Bardsley, W.G. (1985) In: *Structure and functions of Amine Oxidases*. pp. 135-152 Mondovi, B. (ed) CRC press
33. The steady-state kinetics of Lactoperoxidase.
Bardsley, W.G. (1985) In: *The Lactoperoxidase system: Chemistry and Biological Significance*. pp. 55-87 Pruitt, K.M. & Tenovuo, J.O. (Eds.) Marcel Dekker, New York.
34. Critical points and sigmoidicity of positive rational functions.
Wood, R.M.W. & Bardsley, W.G. (1985) *Amer. Math. Month.* **92(1)**, 37-48
35. Bile salt stimulated Lipase and Esterase activity in human milk after collection, storage and heating: nutritional implications.
Wardell, J.M., Wright, A.J., Bardsley, W.G. & D'Souza S.W. (1984) *Pediat. Res.* **18**, 382-386
36. Simple enzyme kinetic mechanisms that can give all possible velocity profiles with chemically reasonable rate constant values.
Bardsley, W.G. (1983) *J. theor. Biol.* **104**, 485-491
37. Kinetic analysis of cell spreading. II. Substratum adhesion requirements of amniotic epithelial (FL) cells.
Aplin, J.D., Bardsley, W.G. & Niven, V.M. (1983) *J. Cell Sci.* **61**, 375-388
38. Kinetic analysis of cell spreading. I. Theory and modelling of curves.
Bardsley, W.G. & Aplin, J.D. (1983) *J. Cell Sci.* **61**, 365-373
39. Inhibition of enzymes by excess substrate. A theoretical and Monte Carlo study of turning points in $v(S)$ graphs.
Bardsley, W.G., Solano-Munoz, F., Wright, A.J. & McGinlay, P.B. (1983) *J. Mol. Biol.* **169**, 597-617

40. Evidence concerning a possible steady-state rate equation for E. Coli Alkaline Phosphatase. Del Arco,A., Burguillo,F.J. & Bardsley,W.G. (1984) *Int. J. Biochem.* **16**, 189-194
41. Steady-state kinetics of thyroid peroxidase. Evidence for a high degree rate equation using the F statistic. Solano-Munoz,F., Iborra,J.L., Lozano,J.A. & Bardsley,W.G. (1983) *Int. J. Biochem.* **15**, 1195-1200
42. Use of the F test for determining the degree of enzyme-kinetic and ligand-binding data. A Monte Carlo simulation study. Burguillo,F.J., Wright,A.J. & Bardsley,W.G. (1983) *Biochem. J.* **211**, 23-34
43. A new approach to the measurement of sigmoid curves with enzyme kinetic and ligand binding data. Bardsley,W.G. & Wright,A.J. (1983) *J. Mol. biol.* **165**, 163-182
44. The probability of obtaining complex kinetic curves for enzyme mechanisms with cubic terms in the pseudo-steady state rate equations. Wardell,J.M., Bardsley,W.G., Kavanagh,J.P. & Wood,R.M.W. (1982) *J. theor. Biol.* **95**, 465-487
45. The generation of non-linear pH gradients for chromatography by using only simple apparatus. Bardsley,W.G. & Wardell,J.M. (1982) *J. Chromatography* **242**, 209-225
46. Steady-state kinetic studies on Benzylamine Oxidase from pig plasma. Kelly,I.D., Knowles,P.F., Yadav,K.D.S., Bardsley, W.G., Leff,P. & Waight,R.D. (1981) *Eur. J. Biochem.* **114**, 133-138
47. The probability that complex enzyme kinetic curves can be caused by activators and inhibitors. Solano-Munoz,F., Bardsley,W.G. & Indge,K.I. (1981) *Biochem. J.* **195**, 589-601
48. The generation of non-linear solute gradients for chromatography using only simple apparatus. Solano-Munoz,F & Bardsley,W.G. (1981) *Biochem. J.* **193**, 991-996
49. Deviations from Michaelis-Menten kinetics. Computation of the probabilities of obtaining complex curves from simple kinetic schemes. Solano-Munoz,F., McGinlay,P.B., Woolfson,R & Bardsley,W.G. (1980) *Biochem. J.* **193**, 339-352
50. Relationships between the magnitude of Hill plot slopes, apparent binding constants and factorability of binding polynomials and their Hessians. Bardsley,W.G., Woolfson,R. & Wood,R.M.W. (1980) *J. theor. Biol.* **85**, 247-284
51. Some mathematical results concerning Hessians of binding polynomials and co-operativity coefficients. Bardsley,W.G., Woolfson,R. & Wood, R.M.W. (1980) *J. theor. Biol.* **85**, 45-51
52. Levamisole and other Diamine Oxidase inhibitors as inhibitors of sperm motility. Kavanagh,J.P., Brightwell,R., Bardsley,W.G. & Schneiden,H. (1981) *Arch. Androl.* **7**, 51-62
53. Deviations from Michaelis-Menten kinetics. The possibility of complicated curves for simple kinetic schemes and the computer fitting of experimental data for Acetylcholine Esterase, Acid Phosphatase, Adenosine Deaminase, Arylsulphatase, Benzylamine Oxidase, Chymotryosin, Fumarase, Galactose Dehydrogenase, β -Galactosidase, Lactate Dehydrogenase, Peroxidase and Xanthine Oxidase. Bardsley,W.G., Leff,P, Kavanagh,J. & Waight,R.D. (1980) *Biochem. J.* **187**, 739-765
54. An analogue of the binding polynomial for the case of ligands binding to an aggregating macromolecule. Woolfson,R. & Bardsley,W.G. (1980) *J. Mol. biol.* **136**, 451-454
55. The identity of the Acid and Alkaline Phosphatases of human seminal plasma. Kavanagh,J.P. & Bardsley,W.G. (1979) *J. Reprod. Fertil.* **57**, 43-48
56. Pharmacokinetics of Chlorambucil in ovarian carcinoma using a new HPLC assay. Leff,P. & Bardsley,W.G. (1979) *Biochem. Pharmacol.* **28**, 1289-1292

57. The theory and graphical tests for homotropic and heterotropic effects.
Bardsley, W.G. (1978) In: *New trends in the description of the general mechanism and regulation of enzymes*. pp. 35-62 Damjanovich, S., Elodi, P. & Somogyi, B. (Eds.) Akademiai Kiado, Budapest (Symp. Biol. Hung. 21)
58. Human placental Diamine Oxidase concentration and Urogasterone: a possible role in polyamine metabolism and fetal growth control.
Scott, I.V., Bardsley, W.G., Greory, H.A. & Tindall, V.R. (1979) In: *Clinical Enzymology Symposia 2*, ed. Burlina, A. and Galzigna, L. pp. 563-578. Piccin Medical Books, Padua and London.
59. Concerning the thermodynamic definition and graphical manifestations of positive and negative cooperativity.
Bardsley, W.G. & Wyman, J. (1978) *J. theor. Biol.* **72**, 373-376
60. Factorability of the Hessian of the binding polynomial. The central issue concerning statistical ratios between binding constants, Hill plot slope and positive and negative cooperativity.
Bardsley, W.G. & Waight, R.D. (1978) *J. theor. Biol.* **72**, 321-372
61. A study of peroxidase levels in human cervical mucus as an index of ovulation.
Shindler, J.S., Howarth, K., Axon, A., Bardsley, W.G., Tindall, V.R. & Laing, I (1977) *J. Reprod. Fertil.* **51**, 413-417
62. The determination of positive and negative cooperativity with allosteric enzymes and the interpretation of sigmoid curves and non-linear double reciprocal plots for the MWC and KNF models.
Bardsley, W.G. & Waight, R.D. (1978) *J. theor. Biol.* **70**, 135-156
63. Steady-state kinetic studies concerning the negative cooperativity and flip-flop mechanism for E. Coli Alkaline Phosphatase.
Waight, R.D., Leff, P. & Bardsley, W.G. (1977) *Biochem. J.* **167**, 787-798
64. Modification of enzyme action by non-specific binding of substrates.
Waight, R.D. & Bardsley, W. G. (1977) *Biochem. Soc. trans.* **5**, 782-785
65. On the interpretation on non-linear semi-logarithmic plots for the time-dependent inhibition of acetylcholinesterase by active site directed reagents.
Leff, P. & Bardsley, W.G. (1977) *Biochem. Soc. trans.* **5**, 778-782
66. Some examples of the use of the theoretical parent hyperbola concept in enzyme kinetics.
Waight, R.D. & Bardsley, W.G. (1977) *Biochem. Soc. trans.* **5**, 785-789
67. The meaning of apparent kinetic constants obtained from non-linear double reciprocal plots.
Bardsley, W.G. (1977) *Biochem. Soc. trans.* **5**, 756-758
68. The degree of steady-state rate equations for multi subunit allosteric enzymes.
Waight, R.D. & Bardsley, W.G. (1977) *Biochem. Soc. trans.* **5**, 758-761
69. Does any enzyme follow the Michaelis-Menten equation ?
Hill, C.M., Waight, R.D. & Bardsley, W.G. (1977) *Mol. Cell. Biochem.* **15**, 173-178
70. The relationship between cooperativity coefficients, factorability of the binding polynomial and curve shape.
Bardsley, W.G. (1977) *J. Mol. Biol.* **113**, 573-578
71. Factorability of the allosteric binding polynomial and graphical manifestations of cooperativity in third degree saturation functions.
Bardsley, W.G. (1977) *J. theor. Biol.* **67**, 407-431

72. The graphical diagnosis of positive and negative cooperativity and the factorability of the allosteric binding polynomial.
Bardsley, W.G. (1977) *Biochem. Soc. trans.* **5**, 753-756
73. The reduction in degree of allosteric and other complex rate equations using Sylvester's dialytic method of elimination.
Bardsley, W.G. (1977) *J. theor. Biol.* **67**, 121-139
74. The 3:3 function in enzyme kinetics. Possible shapes of v/S and $(1/v)/(1/S)$ plots for third degree steady-state rate equations.
Bardsley, W.G. (1977) *J. theor. Biol.* **65**, 281-316
75. Primary kinetic isotope effects in enzyme-catalysed reactions. A theoretical treatment and new experimental methods of study.
Bardsley, W.G. & Waight, R.D. (1976) *J. theor. Biol.* **63**, 325-345
76. An analysis of non-linear Eadie-Hofstee-Scatchard representations of ligand binding and initial-rate data for allosteric and other complex enzyme mechanisms.
Childs, R.E. & Bardsley, W.G. (1976) *J. theor. Biol.* **63**, 1-18
77. Human placental Amine Oxidase and plasma DAO levels in pregnancy and cancer.
Scott, I.V., Childs, R.E., Crabbe, M.J.C., Tindall, V.R. & Bardsley, W.G. (1977) In: *Clinical Enzymology Symposia 1*, Ed. Burlina, A. & Galzigna, L. pp. 97-112. Piccin medical Books, Padua and London.
78. Human kidney Diamine Oxidase. Inhibition studies.
Shindler, J.S. & Bardsley, W.G. (1976) *Biochem. Pharmacol.* **25**, 2689-2694
79. New methods for the study of complex enzyme kinetics. Illustrated by analysis of the wavy v vs. S curves and non-linear double reciprocal plots for human placental 15-hydroxyprostaglandin dehydrogenase.
Bardsley, W.G. & Crabbe, M.J.C. (1976) *Eur. J. Biochem.* **68**, 611-619
80. Deviation from Michaelis-Menten kinetics for Fumarase.
Crabbe, M.J.C. & Bardsley, W.G. (1976) *Biochem. J.* **157**, 333-337
81. Human placental Diamine Oxidase. Improved purification and characterisation of a copper- and manganese-containing Amine Oxidase with novel substrate specificity.
Crabbe, M.J.C., Waight, R.D., Bardsley, W.G., Barker, R.W., Kelly, I.D. & Knowles, P.F. (1976) *Biochem. J.* **155**, 679-687
82. Peroxidase from human cervical mucus. The isolation and characterisation.
Shindler, J.S., Childs, R.E. & Bardsley, W.G. (1976) *Eur. J. Biochem.* **65**, 325-331
83. The quantitative analysis of ligand-binding and initial-rate data for allosteric and other complex mechanisms.
Bardsley, W.G. (1976) *Biochem. J.* **153**, 101-117
84. Time dependent inhibition of Diamine Oxidase by carbonyl-group reagents and urea.
Crabbe, M.J.C., Childs, R.E. & Bardsley, W.G. (1975) *Eur. J. Biochem.* **60**, 325-333
85. Steady-state kinetics of Lactoperoxidase with ABTS as chromogen.
Shindler, J.S. & Bardsley, W.G. (1975) *Biochem. Biophys. Res. Commun.* **67**, 1307-1312
86. Sigmoid curves, non-linear double reciprocal plots and allostereism.
Bardsley, W.G. & Childs, R.E. (1975) *Biochem. J.* **149**, 313-328
87. Time dependent inhibition of enzymes by active-site directed reagents. A theoretical treatment of the kinetics of affinity labelling.
Childs, R.E. & Bardsley, W.G. (1975) *J. theor. Biol.* **53**, 381-394

88. Allosteric and related phenomena. An analysis of sigmoid and non-hyperbolic functions.
Childs,R.E. & Bardsley,W.G. (1975) *J. theor. Biol.* **50**, 45-58
89. Histamine and related compounds as substrates of Diamine Oxidase (Histaminase).
Hill,C.M & Bardsley,W.G. (1975) *Biochem. Pharmacol.* **24**, 253-257
90. The steady-state kinetics of Peroxidase with 2,2'-azino-di-(3-ethyl-bezthiazoline-6-sulphonic acid) as chromogen.
Childs,R.E. & Bardsley,W.G. (1975) *Biochem. J.* **145**, 93-103
91. A method for determining Diamine Oxidase (Histaminase) in biological fluids.
Bardsley,W.G., Crabbe,M.J.C. & Scott,I.V. (1974) *Biochem. Med.* **11**, 138-146
92. Monoamine Oxidase inhibitors and other drugs as inhibitors of Diamine Oxidase from human placenta and pig kidney.
Crabbe,M.J.C & Bardsley,W.G. (1974) *Biochem. Pharmacol.* (1974) **23**, 2983-2990
93. The inhibition of human placental Amine Oxidase by substrate analogues.
Crabbe,M.J.C & Bardsley,W.G. (1974) *Biochem. J.* **139**, 183-189
94. The Amine Oxidases of human placenta and pregnancy plasma.
Bardsley,W.G., Crabbe,M.J.C. & Scott,I.V. (1974) *Biochem. J.* **139**, 169-181
95. Inhibition of enzymes by metal ion chelating reagents: The action of copper chelating agents on Diamine Oxidase.
Bardsley,W.G., Crabbe,M.J.C. & Childs,R.E. (1974) *Biochem. J.* **137**, 61-66
96. Inhibition of enzymes by metal ion chelating reagents. Theory and new graphical methods of study.
Bardsley,W.G. & Childs,R.E. (1974) *Biochem. J.* **137**, 55-60
97. Kinetics of the Diamine Oxidase reaction.
Bardsley,W.G., Crabbe,M.J.C. & Shindler,J.S. (1973) *Biochem. J.* **131**, 459-469
98. Properties of purified human placental Amine Oxidase and a possible role for this enzyme in normal pregnancy.
Bardsley,W.G. & Crabbe,M.J.C. (1973) *Biochem. Soc. trans.*
99. Inhibition of pig kidney Diamine Oxidase by substrate analogues.
Bardsley,W.G. & Ashford,J.S. (1972) *Biochem. J.* **128**, 253-263
100. Oxidation of p-dimethylaminomethylbenzylamine by pig kidney Diamine Oxidase.
Bardsley,W.G., Crabbe,M.J.C., Shindler,J.S. & Ashford,J.S. (1972) *Biochem. J.* **127**, 875-879
101. Synthesis and oxidation of aminoalkyl-onium compounds by pig kidney Diamine Oxidase.
Bardsley,W.G., Ashford,J.S & Hill,C.M. (1971) *Biochem. J.* **122**, 557-567
102. Furano- and Pyrano-indolines: model compounds for indole alkaloid studies.
Britten,A.Z., Bardsley,W.G. & Hill,C.M. (1971) *Tetrahedron* **27**, 5631-5639
103. A reinvestigation of the substrate specificity of pig kidney Diamine Oxidase.
Bardsley,W.G., Hill,C.M. & Lobley,R.W. (1970) *Biochem. J.* **117**, 169-176
104. A study of the substrate-binding site in hog kidney Diamine Oxidase.
Bardsley,W.G. & Hill,C.M. (1970) *Biophys. Res. Commun.* **41**, 1068-1071
105. A reinvestigation of the substrate specificity of pig kidney Diamine Oxidase.
Bardsley,W.G, Hill,C.M & Lobley,R.W. (1969) *Brit. J. Pharmacol.* **37**, 541P
106. The structure of Calycanthidine.
Saxton,J.E., Bardsley,W.G. & Smith,G.F. (1962) *Proc. Chem. Soc.* 148
